SPRING '25 WORKBOOK

PEOPLE DON'T COME TO THE PACIFIC NORTHWEST TO BE THE SAME AS EVERYONE ELSE. IT'S JUST NEVER BEEN THAT KIND OF PLACE.

WE THINK A LITTLE DIFFERENTLY. WE TEND TO PUT EXPERIENCES AND KNOWLEDGE, BOTH ABOUT THE WORLD AND OURSELVES, ABOVE POSSESSIONS AND THINGS.

TO SOME IT MIGHT LOOK LIKE COMING HERE IS RUNNING AWAY FROM SOMETHING. AND SURE, THERE IS AN ELEMENT OF ESCAPISM TO PICKING UP, COMING WEST AND PIONEERING ONE'S OWN TRAIL.

BUT THE WAY WE SEE IT, IT'S MORE ABOUT WHAT YOU'RE GOING TO DO. WHAT YOU'RE REALLY AFTER. WHAT YOU CRAVE DEEP DOWN IN YOUR SOUL SO MUCH AND SO BAD THAT YOU'RE WILLING TO DO ANYTHING AND EVERYTHING TO GET IT.

THESE RIGORS AND REWARDS THE PACIFIC NORTHWEST OFFER ARE INGRAINED IN OUR VALUES.

IT MIGHT BE A PLACE YOU NEED TO VISIT AND REVISIT TO BE YOUR BEST SELF. A WAY OF LIFE YOU YEARN FOR THAT IS VASTLY DIFFERENT FROM THE ONE YOU'VE ALWAYS KNOWN.

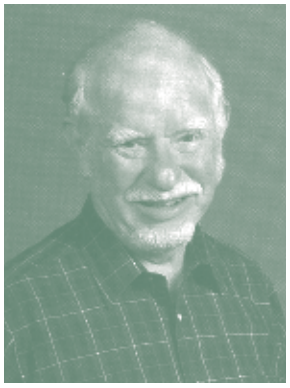
IT'S A COMMITMENT TO SOMETHING YOU FEEL UNEQUIVOCALLY CALLED TO, OR SIMPLY THE NEED TO STAND UP FOR YOUR BELIEFS AND WHAT'S RIGHT.

TO THOSE OF YOU WHO NOD YOUR HEAD, UNDERSTANDING OF WHAT WE SPEAK, KNOW THIS:

WE MAKE OUR BOOTS FOR YOU.

GO THERE

“Made by people interested in people.”



My business has been built on quality in material, craftsmanship, and fit. I have the shoemakers with the know-how. We’ll never be too busy to take care of your needs.

You will find in this catalog new items made by people interested in people. I am offering them to you because I want to keep you as an active customer for as long as it takes you to wear out our boots, whether it is one or ten years. I have used these items myself and can vouch for each of them.

- BILL DANNER

THE DANNER STANDARD

- DESIGN
- PREMIUM MATERIALS
- ENGINEERING
- LAB TESTING
- FIELD TESTING
- MANUFACTURING
- RECRAFTING

OUR QUALITY IS BUILT UPON EXPERIENCE

Here at Danner, we commit ourselves to a higher standard: to build boots that you can trust with your life and livelihood. We call this the Danner Standard, and you'll find it woven into our process everywhere you look. Each step builds upon the last to create a boot that is greater than simply its materials—a boot that enables you to push your potential. The Danner Standard is cultivated from our experience building boots, as well as your experience wearing them. It's the end result of premium components, thoughtful design, hours on the factory floor and myriad river crossings. Together, we define the Danner Standard.

DESIGN

INFORMED BY YOU.
DESIGNED FOR YOU.

Real people work here at Danner. You pass by them on the trail and see them at the hardware store. The design of our boots is informed by experience, both ours and yours. We design boots to overcome the challenges we face in real life, and meld our 90-year legacy in the outdoors with modern technologies to meet your needs, today.

The Danner Standard is a careful balance. We honor our past while looking to the future, designing heritage-inspired boots with cutting-edge performance—boots that last longer, perform better, and are more durable than the competition. We call this Performance Heritage.

PREMIUM MATERIALS

QUALITY BOOTS START WITH QUALITY MATERIALS.

Nothing short of the best materials are up to the Danner Standard—because you rely on our boots. Take our leather: each hide is hand-inspected, and must pass five tests to ensure that only the best makes it to the boots on your feet.

The Danner Standard likewise extends beyond the walls of our factories. It is our guiding principle for sourcing materials and building relationships. In the 1960's, we began our long-standing partnership with Vibram®, producers of the highest-quality soles on the planet. Later, in the 1970s, we collaborated with GORE-TEX® to pioneer the use of its revolutionary technology in footwear. These partnerships endure to this day and fuel our mission to craft the highest quality boots possible.

ENGINEERING

WHERE OUR BOOTS COME TO LIFE.

It's a long journey from the design table to your feet. Not every concept makes it that far, but those that do, come to life in the Nest. The Nest is a laboratory of sorts, a remarkable array of machines and materials that sits within the Danner factory.

Here, ideas jump from the screen and become reality at the hands of skilled craftspeople with decades of experience. A sketch is transformed into a full boot prototype, before it is disassembled, analyzed, revised and rebuilt. This cycle continues, again, and again and again. Until it's lighter and stronger. Until it fits better and is more durable. Until it's up to the Danner Standard.

LAB TESTING

RE-CREATING OUT THERE, IN HERE.

It's impossible to re-create nature—but the Danner Standard demands that we must try. In a lab that overlooks the factory floor, we imagine the furthest reaches of human ability.

Here, we control chaos. We fully submerge boots in water, and with a razor-sharp eye, we observe a single bubble escaping from a GORE-TEX® liner. It is rejected. We flex boots thousands of times: decades of hikes compressed into a single day. We test in mild conditions and in chambers built to mimic the arctic cold. We test new boots in development as well as well-worn boots that have been used for years.

We test, so you can trust.

FIELD TESTING

PUSHED TO THEIR LIMITS, SO YOU CAN PUSH YOURS.

The Danner Standard calls for four months of field testing with real people. Contractors, photographers, search and rescue crews, tire specialists, and our own dedicated workers in the Danner factory. People like you.

We ask them not to hold back, and they can put a year's worth of normal wear in a third of the time. We make sure our boots are pushed to their limits so you can rely on them when you are pushing yours.

Once our testers have done their worst, the boots are brought back to the Nest, where they're torn down and analyzed, piece by piece. We look for ways to improve them. And then, the whole process starts over. The Danner Standard is not a fixed goal, but a mindset to build the best boots possible and find ways to make the next ones even better.

MANUFACTURING

THE SAME STANDARD, ACROSS THE GLOBE.

Building our boots to the Danner Standard means searching far and wide. We scour the globe for the ideal materials, processes and people to craft our boots.

For certain styles, like our heritage leather boots, that means crafting them by hand with stitchdown construction, right here in Portland, Oregon. For others, including our cement-down styles infused with the latest technology and built from lightweight technical materials, the best boots are made with our carefully vetted partners overseas. No matter where or how they're made, you can trust we make them that way because it's the best way possible. That's the Danner Standard guarantee.

RECRAFTING

QUALITY FOR THE LONG HAUL.

Our commitment extends long past the moment you take a pair of our boots home. It was that way back in 1932 when Charles Danner founded the company and it's still the case today. At the core of this commitment is Danner Recrafting, a dedicated department with a range of services to repair and recondition your boots, extending their life and keeping them doing what they do best.

Recrafting is a call to action for us all, a higher standard for how we craft, consume and care for the objects that enable our way of life. Recrafting is the ultimate realization of the Danner Standard: it is only by crafting a boot of the utmost quality that it can be used year after year, repaired, and put back into service.

RECRAFTABLE

DANNER.COM/RECRAFTING

REINVENTING THE MOLD.

A MORE PRECISE FIT FOR WOMEN.

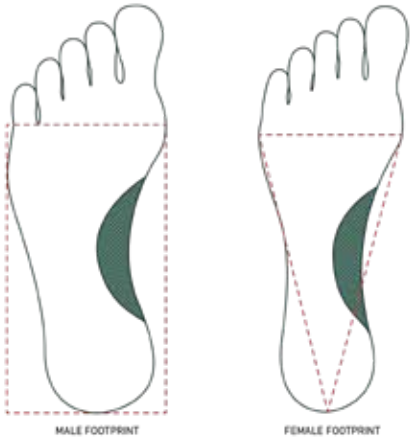
We build footwear for those who cut fresh trails. Those who pioneer. To do this, we use science, data, feedback from our customers and more to continue our craft of quality support for women.

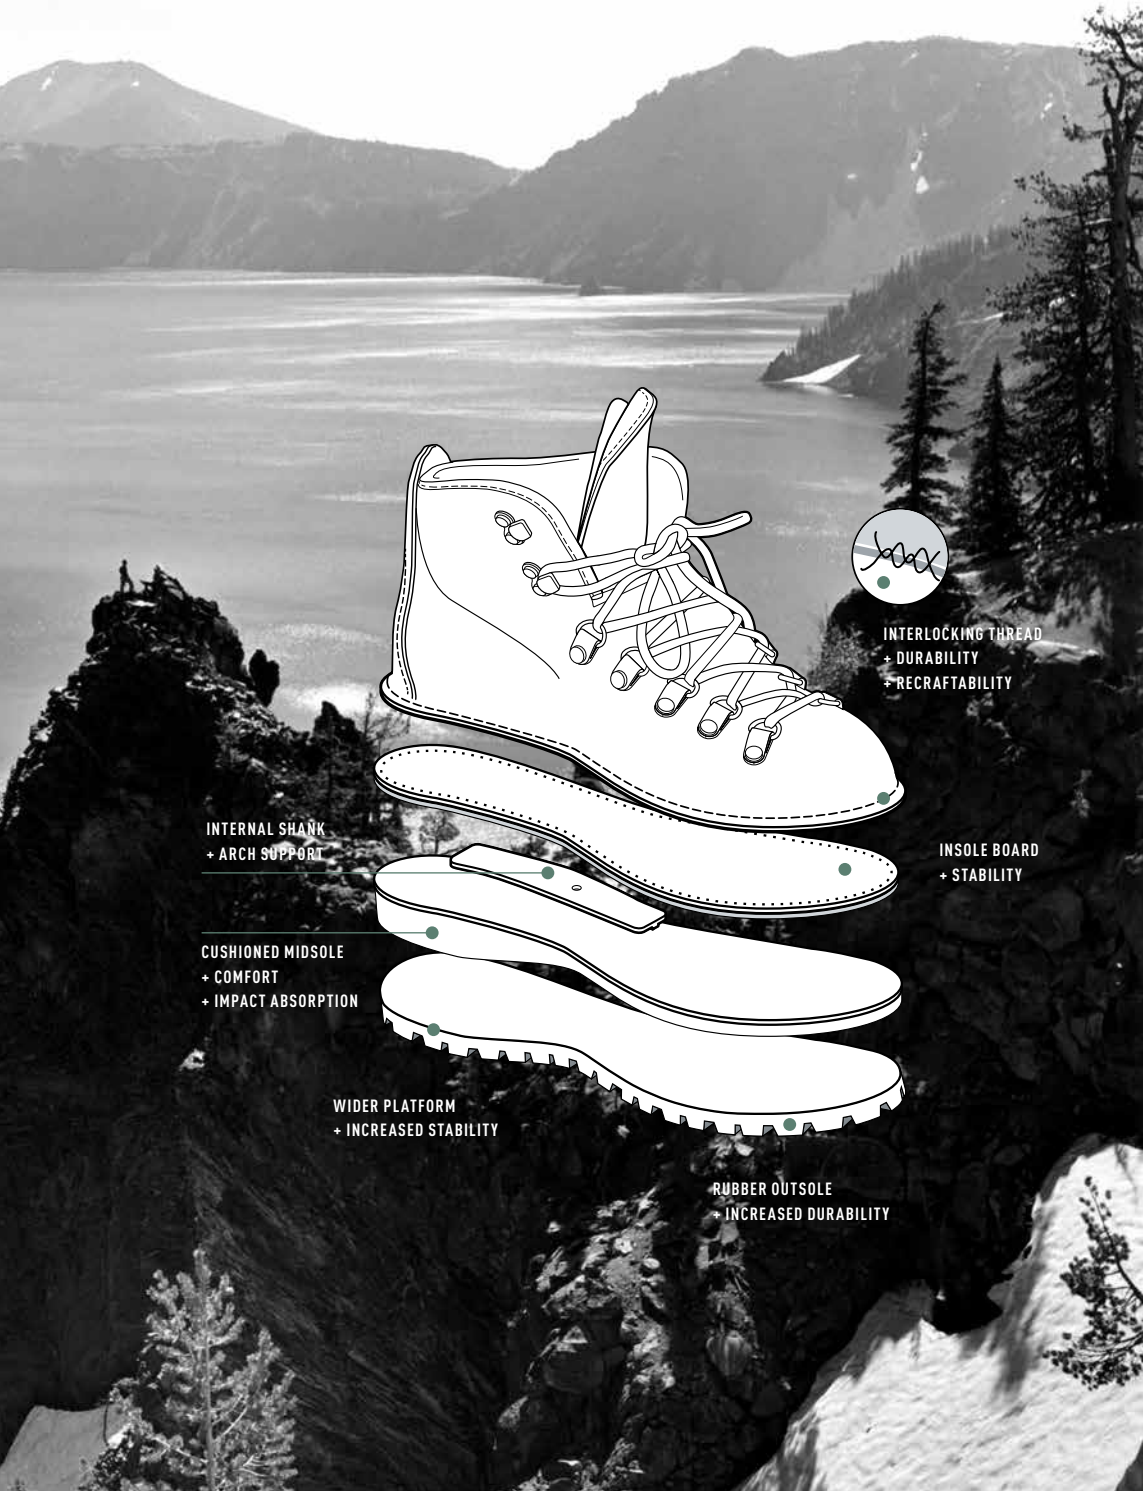
We spent three years researching what women need when they're out on the trails, at the jobsite, deep in the backcountry or casually strolling through town. We gathered data from multiple tests, consulted the experts, and examined the science. Our team looked at the best features of all our women's boots and combined them with many iterations of feedback, careful testing and scans of more than 70,000 feet. We considered the pressure points, the spacing of the metatarsals and the ways women use our boots for hiking, working and everyday life. And now, after all of the miles we've traveled, we're excited to introduce the women's Precision Fit.

"We reached out to women across the United States to ask what they wanted," says Pamela Lo, Danner product line manager. "We knew we wanted a boot that was functional and aesthetically pleasing, but we also specifically asked them to tell us what they needed."

We broke the mold and created a brand-new one. We built a custom-fitted heel to accommodate the narrower anatomy of a woman's foot. We widened the toe box. We designed an improved instep to make sure there are no hotspots, reducing blisters. We added even better ankle support. We invited a group of women into a panel discussion, then we hired designers and colorists to give us the most modern visuals. We asked our best and brightest to create a prototype. Then we tested it—and improved it more.

Our boots have always been the best in the industry, but we knew we could do even better for women—and we have. These boots have Danner's legendary durability. This is not a men's boot that's been adjusted, or painted pink, or made smaller. This is a custom fit, built for women—because when your boots are made for walking, they're also made for working. For exploring. For finding adventure. For life.



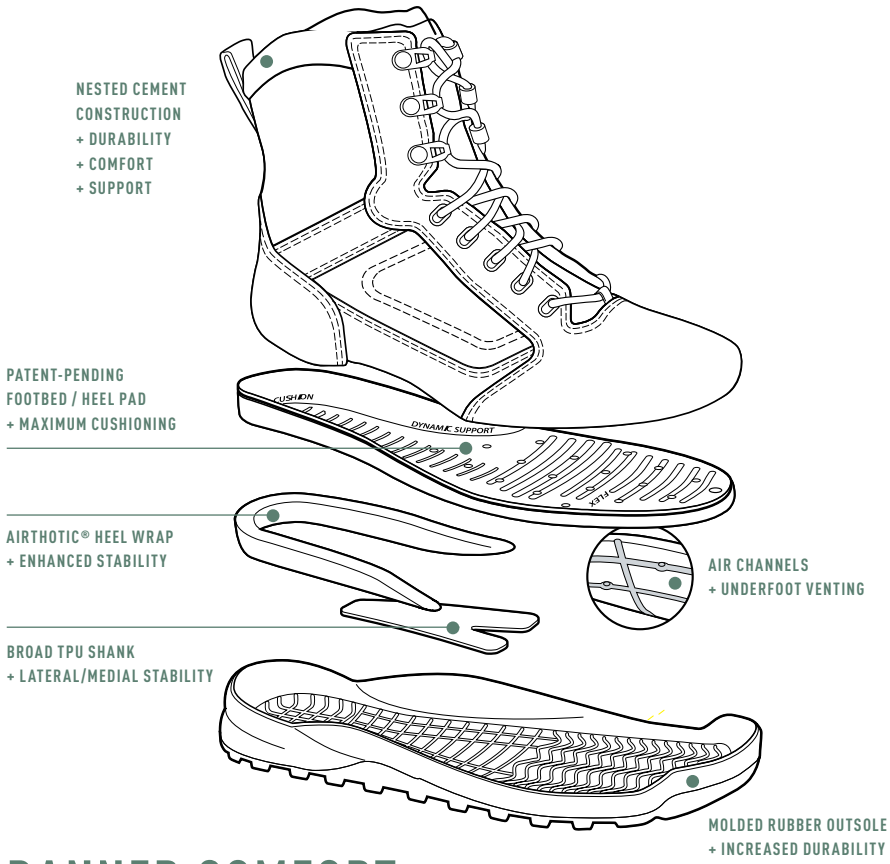


CONSTRUCTED TO GO THERE

ORIGINAL STITCHDOWN CONSTRUCTION

Original Stitchdown Construction is Danner's most iconic footwear construction and one of the longest lasting, most durable and stable platforms in the industry.

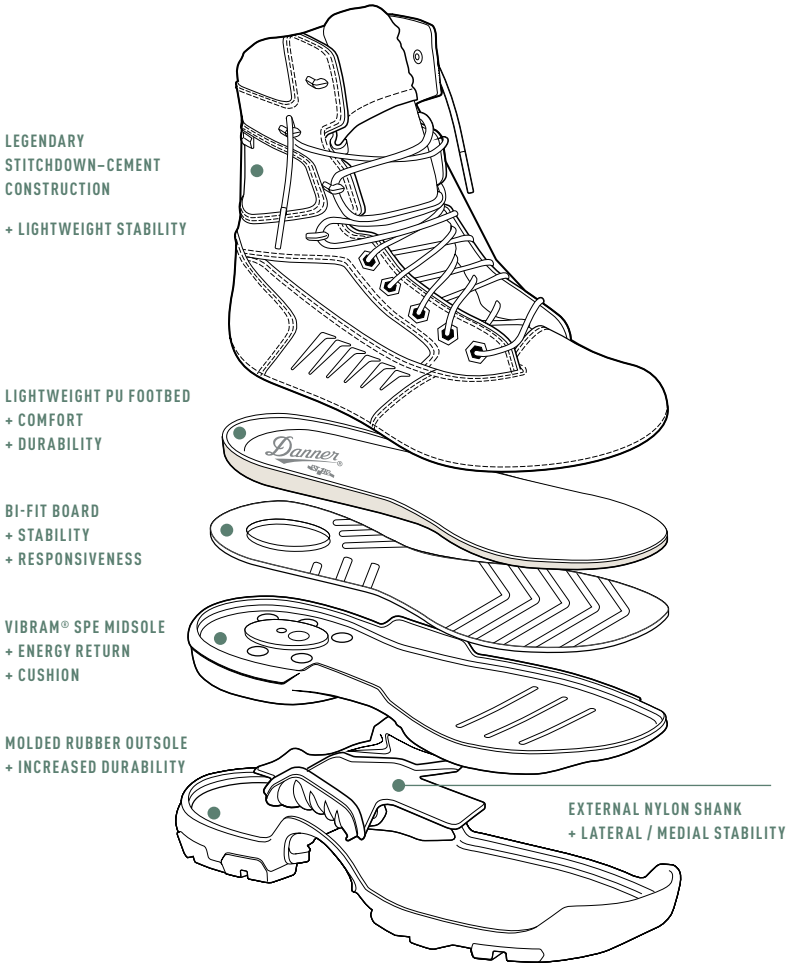
// STITCHDOWN



DANNER COMFORT SYSTEM

The **Danner® Comfort System** is anatomically designed with a broader toe box for a more responsive fit, offering air vents for increased breathability, an Airthotic® heel wrap for enhanced stability and a 15mm-thick heel impact zone for maximum shock absorption, providing a complete package for total foot comfort.

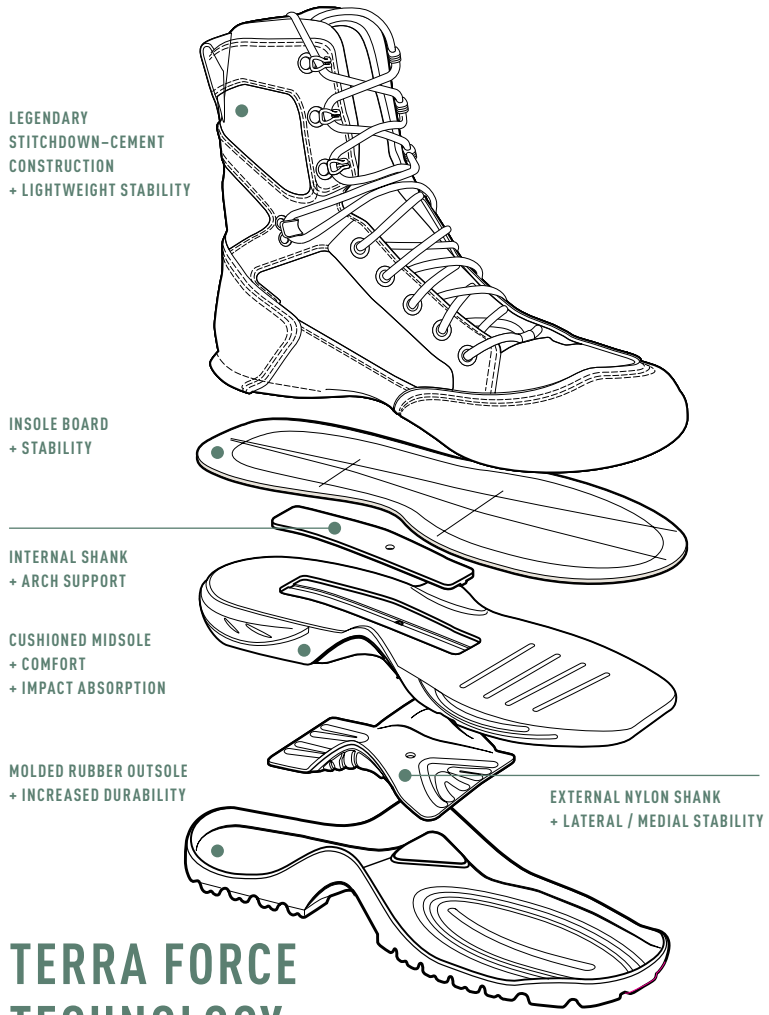
// DCS



TERRA FORCE NEXT TECHNOLOGY

TERRA FORCE® Next™ Technology delivers the legendary performance of TERRA FORCE® with added responsiveness, durability and comfort.

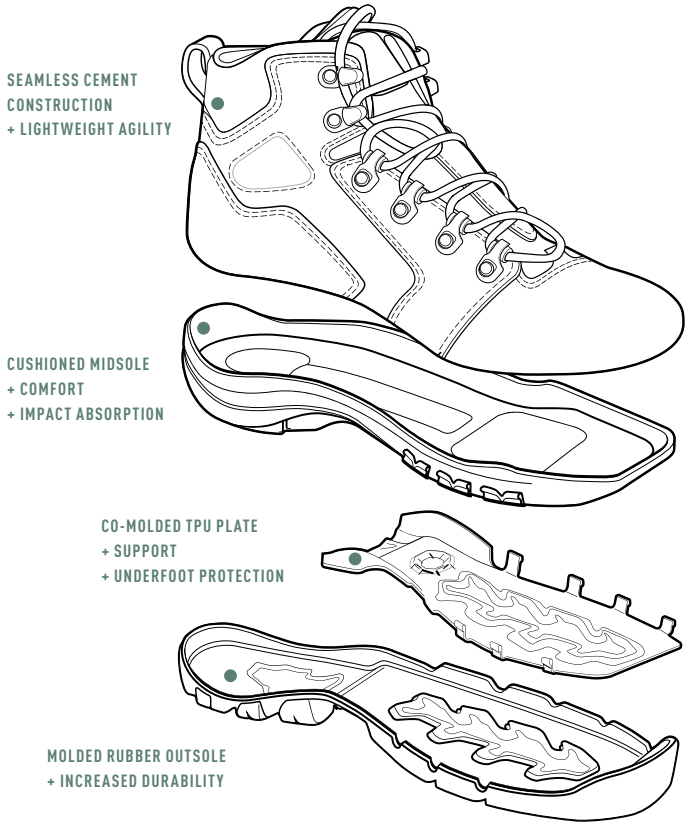
// TFN



TERRA FORCE TECHNOLOGY

TERRA FORCE® Technology utilizes a combination of stitchdown and cement constructions, providing a lightweight platform with superior durability and stability.

// TF



TRAILGUARD PLATFORM

The **Trailguard Platform** is one of our lightest-weight cemented constructions, delivering underfoot protection, support and stability on rugged terrain.
